Hi Mike,

I do not remember making any commitments about this chemical. Do you have a list of attendees and minutes available?

Thanks,

Nancy

Subject: EFED Review of 2,4-D Choline Salt Use.

Hi Sujatha.

I spoke with Kathryn Montague this morning, and asked about why RD did not ask EFED for a risk assessment for 2,4-D Choline Salt.

Kathryn explained that the use of 2,4-D Choline Salt was not considered a new use, and that there were preliminary meetings about two years ago to discuss these submissions with Dow where EFED was asked if they needed to conduct a full risk assessment, or whether data could be bridged. Nancy Andrews represented EFED, so you may want to check with her.

Thanks.

-Mike
